

## Meeting

When: December 14, 1999 7. P.M. (our regular second Tuesday meeting)

Where: Cafeteria at Prospect Place, 9 Hillside Ave., Waltham, MA, Exit 27a

My role in the "Live" Java project has abruptly changed and I am caught not knowing the deal. The Java project is too good to pass up and as one member said, "The group has a lot of synergy, was very productive --- it was enjoyable." So, I plan on having supper at Bertuccis (across the highway - you are welcome to join me) and then hold an informal "Whats Up!" session in lieu of our regular meeting. It is up to you - we will do what you need to help you move forward.

neSOFTdev is just 10 years old and these are your meetings, so help us create neSOFTdev 2000. I see occasional rather than regular meetings and an occasional newsletter. Is that OK?

## A New Sponsor

[Virtual Ink Corp.](#) has contributed a Mimio product to use in this newsletter, etc. Mimio is an electronic whiteboard facilitating the creation of system designs and other communication diagrams to everyone.

They have already agreed to come to one of our meetings for a demo! You will hear more about this tool in neSOFTdev 2000!

**I wish you a super holiday and a great New Millennium!**
